

0319 CLASS PLUS

NON-DRIP WASHABLE WALL PAINT, FOR APPLICATION EVEN ON PLASTERBOARD

Advantages

- Non-drip
- Matt appearance

Description and Use

CLASS PLUS is a non-drip washable emulsion paint based on vinyl resins, easy to apply, offering high hiding power and a strong white colour.

It features good abrasion resistance and a velvet matt appearance.

It is recommended for interior masonry surfaces, new or in need of repainting, even with high absorption such as plasterboard; it can also be used in outdoor sheltered applications, and wherever average weather and environmental conditions will allow for it.

The product can be coloured using ADVANCE HT tinting system.

Substrate preparation

The substrate must be cured, not chalking and clean (without grease, oil or other polluting agents).

For degraded surfaces, remove all traces of old peeling paint and any efflorescence.

In case of mould or algae growth, carry out a treatment with DECISO code 0610.

On plaster, level any unevenness with a suitable levelling compound, and allow the treated areas to rest; fill and rub down holes, cracks and crackles with IMPASTUK UNIVERSAL EXTRA code 0401.

On new, powdery or highly absorbing plaster, on fillings or old flaking paints, apply one layer of masonry fixative to make uniform the substrate absorption. Indoors, use the water-reducible products POLY ACRYL code 0004, or SUPERFIX code 0010 or GREY FIX code 0011, properly reduced. Outdoors, use the solvent-type ready-to-use CLIM-O-PAINT PRO code 1004, or SUPERFIX or GREY FIX.

Once dried, continue applying two coats of CLASS PLUS.
